

Flint Area Hardest Hit Fund Request

July 23, 2015

Introduction:

The City of Flint has experienced a significant housing surplus due to its population and economic decline since the 1980's. Furthermore, the housing and economic crisis that occurred in the late 2000's had a profound negative impact on home values and the economic growth in the Greater Flint area. This led to a decrease in occupied housing and an increase in foreclosure and property vacancy rates. These combined factors contributed to a growing inventory of blighted and abandoned properties. To address this, the Genesee County Land Bank Authority (GCLBA), in collaboration with the City of Flint, Flint Township, Mt. Morris Township, the City of Burton, and Genesee Township applied for and received \$22.7 million in Hardest Hit Fund dollars from the Michigan State Housing Development Authority. The U.S. Department of the Treasury's Hardest Hit Fund, part of the federal Troubled Asset Relief Program (TARP), is designed to help homeowners in states hit hardest by the housing crisis. Last year, Michigan designated \$100 million of its Hardest Hit Fund allocation for blight elimination activities in an effort to further prevent foreclosures and stabilize neighborhoods.

The GCLBA is on track to demolish 1,786 vacant and dilapidated houses by the end of the summer under the largest blight-elimination program ever undertaken in Flint. All but 15 blighted houses have been demolished to date. The demolition of these structures has helped to stem a cycle of decline and disinvestment in neighborhoods, reduce criminal activity, create a renewed sense of hope among residents and generate new investments in housing and businesses.

To build upon the momentum created by this investment and offer new opportunities for re-investment in the Flint Area, **the GCLBA is requesting an additional \$16.6 million in HHF dollars to demolish an additional 1,202 blighted residential structures located within approved HHF areas.** These structures include newly blighted and foreclosed houses held by the Genesee County Treasurer and the GCLBA. Removing these newly blighted houses will go a long way toward creating a blight free Flint.

I. **Description of local project areas within the city limits being targeted for demolition including street boundaries, neighborhood description and rationale for the selection.**

The local project areas, street boundaries, and demolition priorities for the City of Flint are depicted in the Map 1 in Appendix A. A list of all demolition priorities is included in Appendix B. These priorities were identified based on City of Flint and GCLBA dangerous building inspections and data gathered through a City of Flint Master Plan housing condition assessment conducted by more than 27 community-based groups. In alignment with the HHF priorities, each demolition meets one or more of the following criteria;

- Is in direct support of proposed investment of public or private funds including properties that will be redeveloped for residential or commercial use.
- Is directly adjacent to or across from recent public or private investment, proposed investment, or other assets designated as critical investments or institutions by state or local officials.
- In close proximity to schools and institutions.
- Is critical for investment in or improvement of infrastructure, public parks or other locally or state endorsed projects.
- Assists in the stabilization of neighborhoods with high rates of foreclosure prevention services and/or homeownership, or other tipping point indicators.
- Presents a visual impediment along key corridors

Project Areas with the City of Flint:

The following areas within the City of Flint were defined to select demolition priorities that meet the HHF criteria. Each area is described below and depicted in Map 1 in Appendix A.

- **Tipping Point Neighborhoods:** The **lavender areas** include some of the more stable neighborhoods in Flint that have recently experienced an increase in vacancy and foreclosure. Vacancy rates in these areas are below 20% and the majority of the houses were rated to be in “good” or “fair” condition through the City of Flint Master Plan housing condition assessment. These areas also include neighborhoods with the higher state equalized values. Several schools and institutions are located within these areas.
- **Re-investment Neighborhoods:** The **light blue areas** overlap with some of the lavender areas and include neighborhoods with recent investments in new or renovated housing through the Federal Neighborhood Stabilization Program or Habitat for Humanity. These areas also include schools and institutions.
- **Buffer Areas:** The **light yellow areas** include buffer areas surrounding re-investment and tipping point neighborhoods as well as neighborhoods with higher vacancy rates than the adjacent target areas and houses with moderate range assessed property values. Several schools and institutions are also located within these areas. Demolition in these areas will help to stem the spread of blight into tipping point and re-investment neighborhoods.
- **Key Corridors:** The **light green corridors** include commercial business districts and schools that are gateways to the City of Flint from freeways and adjacent communities.

The North Saginaw Street corridor extends one block east and west of the street from Hamilton Avenue to Carpenter Road. This specific corridor is emphasized by the Land Use Plan drafted by the City of Flint's ongoing Master Plan process. The proposed Land Use Plan designates a concentration of coordinated land use types throughout this key corridor, including two large mixed residential areas, one commerce and employment center, one neighborhood center, green neighborhoods, and two city corridors.

- **Carpenter Road Elementary School Neighborhood:** The **light peach** area includes a cluster of blighted properties surrounding Carpenter Road Elementary School. Demolishing several key blighted structures within this area will help to stabilize this small and secluded neighborhood.

II. Description of project areas that are immediately adjacent to the municipality that have been identified. Information should include street boundaries, as well as a description on how the target area will lead to an investment or redevelopment opportunity or otherwise have a direct stabilizing effect within the core city.

The local project areas, street boundaries, and demolition priorities in the areas immediately adjacent to the City of Flint are depicted in Map 2 in Appendix A. A list of all demolition priorities is included in Appendix B. These were identified based upon assessments provided by local building and GCLBA inspectors. In alignment with the HHF priorities, each demolition meets one or more of the following criteria;

- Is in direct support of proposed investment of public or private funds including properties that will be redeveloped for residential or commercial use.
- Is directly adjacent to or across from recent public or private investment, proposed investment, or other assets designated as critical investments or institutions by state or local officials.
- In close proximity to schools and institutions.
- Is critical for investment in or improvement of infrastructure, public parks or other locally or state endorsed projects.
- Assists in the stabilization of neighborhoods with high rates of foreclosure prevention services and/or homeownership, or other tipping point indicators.
- Presents a visual impediment along key corridors

Project Areas Outside of the City of Flint:

Project areas were defined to identify demolition priorities in the adjacent communities that are depicted in Map 2 Appendix A and described below.

- **Tipping Point Neighborhoods:** The **lavender areas** include some of the more stable neighborhoods in the area immediately surrounding the City of Flint that have recently experienced an increase in vacancy and foreclosure. They are in close proximity to schools and institutions. Vacancy rates in these areas are below 20% and include neighborhoods with higher state equalized values.
- **Re-investment Neighborhoods:** The **light blue areas** overlap the lavender areas and include neighborhoods near schools with recent investments in new or renovated housing through the Federal Neighborhood Stabilization Program.
- **Buffer Areas:** The **light yellow areas** include buffer areas surrounding re-investment and tipping point neighborhoods. They include neighborhoods with higher vacancy rates than its adjacent target areas and houses with medium assessed property values. Several schools and institutions are also located within these areas. Demolition in these areas will help to stem the spread of blight into tipping point and re-investment neighborhoods.

Demolition of blighted structures within these areas will help to support recent revitalization efforts by the Neighborhood Stabilization Program in areas adjacent to the City. They will also help to create new investment opportunities and have a direct stabilizing effect within the City of Flint.

III. Identification of properties by address within the project areas target areas within the city limits that have been identified that are likely candidates given all of the eligibility criteria.

The properties proposed for demolition are included in the spreadsheet in Appendix B. They are within the city limits and are likely candidates given the eligibility criteria:

- Are vacant at the time of acquisition
- Can document that their last use was as single-family or multifamily residential
- Have been either (1) deemed a public nuisance according to local code or ordinance; (2) deemed a nuisance because of age, physical condition, or use; OR (3) has had utilities, plumbing, heating, or sewage disconnected, destroyed, removed or rendered ineffective so that the property is unfit for its intended use.
- Can be acquired and demolished for an amount not to exceed \$25,000 per property address or have funds committed in writing that can be leveraged to complete acquisition and demolition.

IV. Identification of partners that will acquire property and contract for demolition. Please include an organizational description, detail of any relevant experience and list of contracts by dollar amount managed by that entity. (Note that all partners identified will need to submit financial an organizational documentation separately to MSHDA)

The properties currently prioritized for demolition under the HHF program are owned by the GCLBA or the Genesee County Treasurer. None of the properties are occupied or located within a Historic District.

The GCLBA will continue to manage the demolition process for all HHF properties. We have extensive experience managing small and large scale demolition projects including apartment complexes, a nursing home, and several commercial and residential properties. Since 2005, our staff has successfully managed the demolition of more than 3,500 blighted structures at an estimated total cost of more than \$40 million. With this experience, we are well qualified to demolish the identified structures within the grant's time frames in compliance with all applicable regulations.

V. Identification of any contractors that the partner will use in carrying out the demolition. (Note that procurement information will need to be reviewed by MSHDA)

Contractors will be selected through a competitive bidding process. MSHDA Partnership Profile documents for the Genesee County Land Bank and the Michigan State Land Bank are completed and on file with MSHDA.

VI. A detailed timeline outlining all required action steps that demonstrates that 25% of all funds can be expended and billed within 6 months of approval, 70% within 12 months of approval and 100% within 18 months of approval. Awards to any community not hitting the 12 or 18 month benchmark will be reduced by the difference between the benchmark and the amount expended as of that date. Failure to hit the 6 month benchmark will result in a review by MSHDA and any operational changes necessary to ensure success.

The Land Bank will expend 25% of all funds within 6 months of approval, 70% within 12 months of approval and 100% within 18 months of approval. To meet these deadlines, we will group the demolition priorities into batches of approximately 100 to 200 properties.

The Genesee County Land Bank understands that \$150 annually will be available for property maintenance for each lot for five years. After the demolitions are complete, the GCLBA will ensure proper maintenance by encouraging adjacent owners to purchase or lease properties for a nominal fee. We will also integrate properties into the Clean & Green program so they can be maintained by local churches and community groups.

VII. Any supporting documents required to document narrative provided such as the following:

- See Appendix A Maps 1 and 2 that identify project areas and likely demolition candidates
- See Appendix B for property ownership rights for likely demolition candidates
- MSHDA Partnership Profile documents for the Genesee County Land Bank and the Michigan State Land Bank are completed and on file with MSHDA
- Contractors will be selected through a competitive bidding process.

Appendices

Appendix A – Maps
